Subject: draft CSD desk statement

Here's a start – let me know your thoughts:

On April 30 through May 2, EPA sampled groundwater near the Central Sands dairy farm in Nekoosa, Wisconsin, after receiving complaints of private drinking water well contamination. EPA has received some preliminary sampling data and is notifying property owners of their individual results as they come in. Once a complete data package is received, EPA will analyze the results and determine if an environmental problem subject to EPA authority exists.
